More about me

I am an empathetic communicative extrovert who likes to meet new people, new cultures and enjoys working in a team. While studying at the university and working as a SAP BW developer, I pursue my passion, which is UI/UX design and front-end development (ReactJS and NextJS). I love to create feelings through UI/UX of web apps. Therefore, in my remaining time I create my own projects and freelance projects focused on the front-end, such as websites for the events "AI Days 2022" in Brno and "Hackathon 2023" of the JINAG agency.
I show my introverted side of my personality mainly when programming and solving problems related to application/program development or playing tennis matches (I have been playing tennis competitively at the national level since I was 8 years old).

Personality typology

Consul
ESFJ-T

Driving license

Driving license class B
